Al Gore
AN INCONVENIENT TRUTH

Paramount Home Video, DVD, \$29.95

Global warming is real. No respected scientist disagrees. We are the ones who are causing it, and if we do not reverse the trend, we will soon reach a "tipping point" that portends the end of civilization as we know it. Directed by Davis Guggenheim, this film is neither "political" nor pessimistic. In fact it is quite rousing. Citizen Gore implores us to have the courage to act now. This powerful documentary demands and commands our attention. No personal film library should be without it. Running time: 100 minutes.

STAIRWAYS TO HEAVEN
The Practical Magic of Sacred Space
Awaken Productions, DVD, \$18.50

This exhilarating film, like a BBC documentary, leads us through the spiritual technology of ancient civilizations. It's an 8,000-year journey to places on earth where the veil between worlds is thinnest: where stone circles emit magnetic fields and ultrasonics, where gigantic slabs of rock stand as colossal monuments, where Gothic cathedrals are secretly encoded with information by Knights Templars, where mysterious crop circles have suddenly appeared. Fascinating insights await you here! Running time: 54 minutes.
